x-SITE-d™ Web Site Creation

stopping butt-ugly web sites

about x-SITE-d™

As you know there are a lot of ugly, slow-loading, ineffective, aggravating Web sites out there.

We know. We've seen them. The Web designers here at x-SITE-d intentionally visit bad Web sites to learn what **not** to do, and with over 16 years of combined experience in this business, we know what not to do **real** well.

x-SITE-d started in 1997 when the public Internet was slowly moving beyond its infancy.

The 'net is now an integral part of our daily lives: from e-mail to in-depth research, online shopping to political support; for good or bad, technology is here to stay.

We are a small, woman owned company specializing in small business, creative business, and home-owner association Web sites.

Our support staff includes an illustrator, Flash designer, proofreader, and copywriter. Someone is always here to help you navigate the often confusing world of the web.

By helping **you** become successful, **we** become successful! Visit our Web site and discover all we have to offer.

Call us at **(972) 240-0187** to put your business or association on the 'net.

web site design

Your Web site design can be as simple or complex as your imagination and budget allows. x-SITE-d will smoothly handle the transition from an idea, to a fully functional Web site.

Utilizing written content, pictures of your products or community, project sheets, online (opt-in only) sign-up email lists, and possible online shopping cart ordering systems, we'll create your ideal Web site.

Each Web site is created individually to suit our clients specific needs; it is visually attractive, easy to navigate, search engine ready, and dial-up modem friendly. We **do not** use pre-designed third-party templates. Ever.

Design fees are **never** pre-determined. Each Web site or project is quoted separately according to the complexity and size.
